

## Accessibility Statement

In consideration of Section 508 of the U.S. Rehabilitation Act (29 U.S.C. 794d), the features and functions in this application have been developed to support users with accessibility requirements. Industry best practices and standards have guided our design and development processes to incorporate accessibility features built into the Windows operating system and the .NET architecture, as well as the Chrome, Firefox, and Edge browsers. The software development team is committed to integrating accessible design thinking throughout the entire product development cycle.

More information on Section 508 and the technical standards can be found at [www.section508.gov](http://www.section508.gov).

If you require assistance or wish to report an issue related to the accessibility of any content on this website, please email [cset@dhs.gov](mailto:cset@dhs.gov). If applicable, please include the web address or URL and the specific problems you have encountered.

### Adobe Acrobat PDF Files

Many of the documents in this application are in HTML or ASCII (plain text) formats. These formats are generally accessible to people who use screen readers. We also have a large number of documents in Adobe Acrobat® Portable Document Format (PDF).

When using a screen reader to read documents directly in PDF format using Adobe Acrobat Reader, you will likely need to install an accessibility plug-in. This plug-in is available free of charge on the [Adobe Accessibility](#) website.

## Accessibility Features

This software works to integrate **WCAG Level A and Level AA** accessibility considerations in every application update and release.

For detailed step-by-step instructions, please expand each feature link to be redirected to the relevant section of the User Guide.

### High Contrast Functionality

All text areas other than the Diagram and Analysis pages support switching to High Contrast mode within the Windows operating system.

## **Keyboard Access**

This software is accessible from the keyboard. All areas of the application other than the Analysis page can be accessed from the keyboard. Most keyboard access is implemented by using the TAB and ARROW keys for navigation, the SPACE and ENTER keys for selection. Additional shortcut or hot keys may be found in the Keyboard Shortcuts dialog.

## **Keyboard Shortcuts**

We offer app-specific keyboard shortcuts in the Help menu.

## **Browser Support**

We recommend the use of Google Chrome, Microsoft Edge, and Mozilla Firefox for optimal application functionality. For accessibility functionality specific to each browser, please visit the following features lists:

[Google Chrome Accessibility Features](#)

[Microsoft Edge Accessibility Features](#)
